PROFESSIONAL SUMMARY

Data Scientist and AI Developer with hands-on experience in Python, SQL, data analysis, machine learning and AI-powered product development. Built a broad portfolio of practical projects and live products, including ExploreXAI, HeatSafe AI and VIA. Author of a beginner-focused Python book and speaker on AI and career guidance. Earlier telecom experience on Reliance Jio and Vodafone Idea projects provides a strong engineering foundation in troubleshooting, reporting, coordination and real-world technical operations.

TECHNICAL SKILLS

Python • SQL • Pandas • NumPy • Data Cleaning • Exploratory Data Analysis (EDA) • Matplotlib • Seaborn • Scikit-learn • Machine Learning • Classification • Model Evaluation • Generative AI • Prompt Engineering • Next.js • React • Streamlit • Supabase • Vercel • Git/GitHub • MS Excel

FEATURED DATA SCIENCE & AI PROJECTS

ExploreXAI - Founder & Developer

Live AI-powered travel planning platform

- Built an AI travel platform with Vranda voice/chat assistance, destination exploration, itinerary generation, packing support and smart trip-planning workflows.
- Integrated hotel/homestay discovery, analytics, subscription/payment flows and production deployment.

Breast Cancer Classification - Machine Learning

- Developed an end-to-end classification workflow using preprocessing and Logistic Regression; evaluated the model using accuracy, precision, recall, confusion matrix and ROC-AUC.
- Achieved approximately 95.8% test accuracy and 0.957 ROC-AUC in the completed model workflow.

HeatSafe AI - Climate Health Assistant

- Created an AI-based climate and health assistant combining weather intelligence, risk alerts, recommendations and a dashboard-oriented user experience.

VIA - vijAI Intelligent Assistant

- Built a bilingual voice-enabled intelligent receptionist/assistant for interactive guidance, enquiries and conversational support.

Additional Data & Analytics Portfolio

- Completed projects across telecom churn, flight delay analysis, e-commerce analytics, EDA, business insights and predictive modeling.
- Portfolio contains 25+ practical projects spanning Data Science, Machine Learning, AI products and web-based applications.

DATA SCIENCE TRAINING

Professional training covering Python, SQL, Pandas, NumPy, data cleaning, preprocessing, EDA, visualization, Scikit-learn and machine-learning workflows.

AUTHOR, TEACHING & PUBLIC SPEAKING

Author - Python For Kids

Beginner-friendly Python learning book

- Authored an educational Python book designed to make programming easier for young beginners through simple explanations, examples and activity-based learning.
- Focused on Python fundamentals, logical thinking, creativity and early problem-solving skills.

Guest Speaker - AI & Career Guidance Seminar

Government Girls Higher Secondary School, Bhatrojkhan, Almora

- Delivered student guidance on career options after Classes 10 and 12, Artificial Intelligence, Data Science, coding, scholarships and emerging technology opportunities.

Python Coding With Snake Sir

Educational learning initiative

- Created a beginner-oriented learning initiative to introduce children to Python, AI and computational thinking through accessible demonstrations and project-based learning.

Career Learning Hub

- Developed a student-guidance platform covering stream selection, scholarships, entrance exams, coding/AI learning resources and career exploration.

PROFESSIONAL EXPERIENCE

CISCO - Reliance Jio 4G Project

Project Coordinator & MIS Coordinator (Contractual)

- Configured and troubleshoot Cisco 920, 903 and 7206VXR routers and provided Level-2 technical support.
- Managed ATP/site coordination, DPR and resource-utilization reporting, daily status tracking and coordination of 25 field engineers.
- Worked with Optical Fiber and Microwave connectivity in telecom deployment environments.

ZTE India Pvt. Ltd. - Vodafone Idea Project

IP Engineer / Technical Support Engineer | Lucknow

- Provided remote technical support for the VIL network and coordinated with SNOC and field teams for issue resolution.
- Worked operationally with OSPF, BGP and MPLS and supported network visibility and DCN planning.

LEADERSHIP & ACADEMIC INNOVATION

Community Leadership

- Three years of village-level leadership experience involving coordination, public interaction, decision-making and community initiatives.

Tongue Motion Controlled Wheelchair - B.Tech Major Project

- Designed an assistive wheelchair concept using tongue-motion detection, Hall Effect sensing, microcontroller processing, wireless control and motor-driven navigation.

EDUCATION

B.Tech - Electronics & Communication Engineering

DIT Dehradun (UTU), 2014

Diploma - Electronics & Communication

Government Polytechnic Nainital, 2011

12th - U.A. Board | 10th - U.A. Board

CERTIFICATIONS & INDUSTRIAL TRAINING

- CCC (Course on Computer Concepts) - NIELIT.
- Signal & Telecommunication Department, Northern Railway - Izatnagar, Bareilly | 6 weeks, June 2013.
- Uttarakhand Power Corporation Limited (UPCL) - Kaldhungi, Nainital | 4 weeks, June 2010.
- Electrical Measurement Laboratory (UPCL) - Haldwani | 2 weeks, February 2011.
